**Roommate Research**

For decades, residential-life offices have received late-summer telephone calls from worried students and parents. "People will read a name and address, and it fits into some category in their head," says Sarah B. Westfall, dean of students at Denison University in Ohio. They expect a diverse student body at almost any college, but many students fear diversity as much as they look forward to it. Any indication that a roommate's life deviates from the familiar can heighten a student's fear of the unknown. Online social networking sites now allow students to get more of those indications than ever before.

According to college officials, many incoming freshmen use Facebook, Orkut, QQ, and other social-networking sites, to do research on their future roommates. Since everything happens anonymously, normally passive students can spring into investigative action without having to approach a live person. On sites like these, anyone can post a profile of himself or herself free. Profiles can include photos, quotes, inside jokes, and lists of their favorite bands and TV shows. The idea is to maximize your attractiveness to people with tastes similar to yours. Facebook has more than 750 million registered users, about 70% of whom are outside the United States. Orkut has about 66 million users, mostly in Brazil and India. QQ, in China, is one of the largest social networks in the world, with more than 300 million active accounts.
